Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 9/19/06.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1-17 in the reply filed on 5/19/05 is acknowledged. Claims 18-28 have been withdrawn from consideration.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 calls for feeding file folder components comprising front and back panels and at least one internal divider then later refers to a second of the file folder components and a third of the file folder components. This is inconsistent as the file folder components are two components (ie. front and back) not three. Furthermore, regarding the "mechanisms": there seem to be four mechanisms (ie. alignment, second, conveyor, third) – again naming only a second and third mechanism creates confusion as both are securing mechanisms, however there is no first such mechanism present.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5, 14-15, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Blair (US 3,260,516).

Blair disclose a method of manufacturing a compartmented folder comprising feeding stations 4 and 5 with conveyors 15 and 16 for conveying file folder components to work stations 3 for taping dividers 11 to first and second panels; see column 3, lines 61+; vacuum pickoff and transfer cups 110; employing alignment mechanism 65 and 172 for aligning components; employing glue mechanism 192 to secure an internal divider edge to a complimentary edge of a component; employing a taping (third) mechanism to secure the edge of a first internal divider to a complementary edge of a file folder component; employing conveyor mechanisms 95 and 96 for moving the file folder components between securing work stations; see figures 1 and 3-5; column 10 lines 19+. The outer components are considered feedstock folder front and back panels; note that Blair recognizes binding to a hard back or binding; see column 3, lines 69+.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 6-13 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blair (US 3,260,516) in view of Blumberg (US 6,190,298).

Blair does not directly disclose pleating tape 6 between divider(s) and front and back panels, however Blumberg teaches roller mechanism 66 for forming pleats in tape 70. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include the pleating mechanism of Blumberg in the invention to Blair in order to improve the seal of the binding/crease i.e. more surface area is taped.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
